CAREER OBJECTIVE

Motivated B.E. Computer Science and Engineering (AI & ML) student, graduating in 2027, seeking an AI/ML Engineer role or internship where I can apply my skills in Python, machine learning, computer vision and LLM-based applications to build reliable, real-world solutions. With an ML internship at Princeton Smart Engineers, hands-on project experience and a 1st Prize at the IDE Bootcamp 2025 organized by AICTE, I aim to contribute to the team's growth while continuing to learn.

EDUCATION

Velalar College of Engineering and Technology, Erode | B.E. Computer Science and Engineering (AI & ML) | 2023 – 2027 | CGPA: 7.94

Hindu Higher Secondary School, Vaniyambadi, Tirupattur | HSC | 2023 | 64.5%

TECHNICAL SKILLS

Languages: Python, Java, C

Machine Learning & AI: Machine Learning, Deep Learning, Computer Vision, Neural Networks, CNN, Classification, Regression, Supervised and Unsupervised Learning, Data Analysis

Libraries & Frameworks: TensorFlow, PyTorch, OpenCV, Pandas, NumPy

Generative AI: LangChain, RAG, Prompt Engineering

Tools: Git, GitHub, Visual Studio Code, Jupyter Notebook, Google Colab

EXPERIENCE

Machine Learning Intern | Princeton Smart Engineers | Dec 2024 – Jan 2025

- Trained and tested classification models on more than 3 real datasets using Scikit-learn, Pandas and NumPy.

PROJECTS

OmniBrain: Agentic Multi-Modal RAG Orchestrator (team project) | LangGraph, VLM, RAG, Python

- Added a vision-language model and a Vision Agent that reads charts and tables from documents. Also built Self-RAG, which rewrites the query and retries retrieval to improve answers.

AI-Based Resume Analyzer and Skill Development Agent | Python, LangChain, Streamlit, PyMuPDF, GenAI

- Parses PDF resumes in-memory and performs structured skill-gap analysis against target job roles; generates tailored 4-week learning roadmaps, portfolio projects, and interview prep with zero hallucination.

AI-Based Driver Drowsiness Detection System | Python, CNN, OpenCV

- Detects driver drowsiness from a live camera feed and triggers an alert. Built with CNN, OpenCV and MediaPipe; 98% detection accuracy.

AI-Powered Fake Image and Video Detection System | Python, Machine Learning

- Detects fake images and videos using a machine learning model; 98% detection accuracy.

ACHIEVEMENTS

- **1st Prize**, national-level IDE Bootcamp 2025 (Edition 2, Phase II) idea pitching competition, organized by AICTE and MIC at GLA University, Mathura

CERTIFICATIONS

- **LangChain in Action: Develop LLM-Powered Applications**, Udemy, 2026 | LangChain, LLMs, Prompt Optimization, AI Application Development
- **Generative AI Essentials (Career Edge)**, TCS iON, 2026 | Generative AI, Machine Learning, Prompt Engineering, Ethical AI

WORKSHOPS AND TECHNICAL EVENTS

- **AI & ML in Farm Machinery Workshop**, SYNECT'24, Nandha Engineering College | Learned AI/ML applications in agriculture technology
- **Engineer VRO Technical Event**, TECH MELANCE'24, Bannari Amman Institute of Technology | Showcased engineering problem-solving in a technical competition

ADDITIONAL INFORMATION

Soft Skills: Team collaboration, communication, problem-solving, quick learner
